General instructions

3 Bucket System is used as follows:

- Red **Wash**: Soap and hot water
- Yellow **Rinse**: Hot, clear water only
- Green **Sanitise**: Chlorine (150 PPM, Parts Per Million) and warm water, leave to air dry

Note:

During operation use **green bucket** only!

General instructions

Chemical Color Coding and Storage Guidance

Chemicals shall be segregated as per their color coding, preferably a different shelf for each color code. If space does not allow, there must be at least a physical barrier to prevent mixing and chemical reactions.

RED- Flammable Liquids • Shall be stored in accordance with RCI SQM, Safety and Injury Prevention 2.04.07- Storage of Flammable Liquids. • In most cases, flammable chemical storage is restricted to SOLAS category 14 spaces • Small quantities (less than 5 US gallons or 20 liters) may be stored in approved flammable storage cabinets
GREEN- Acids • If possible, store on the lowest shelves. • Must store segregated from other color coded chemicals with at least a physical barrier to prevent the two from flowing together in the event of a spill. • <u>Accidental combination with a base could generate heat and energy, possibly causing an explosion.</u>
BLUE- Bases • If possible, store on the lowest shelves. • Must store segregated from other color coded chemicals with at least a physical barrier to prevent the two from flowing together in the event of a spill. • <u>Accidental combination with an acid could generate heat and energy, possibly causing an explosion.</u>
YELLOW- Oxidizers • If possible, store on the lowest shelves. • Must store segregated from other color coded chemicals with at least a physical barrier to prevent mixing in the event of a spill. • <u>Accidental combination with an acid could generate poisonous chlorine gas</u> • <u>Should be removed from their cardboard boxes and away from any paper materials as spills may react with these materials and spontaneously ignite.</u>
BLACK- Toxic • Shall not be stored near food or food packaging. • Should be stored separately from all other materials.
WHITE- General • These chemicals pose little hazard, but should be stored with other white-coded products.

- Only use chemicals designated to the F&B Service Department (Do not use chemicals or cleaning materials from other departments, e.g. insecticide, rust remover, etc.).
- Please always follow colour coding when storing chemicals
- Do not store any of these chemicals or any other hazardous chemicals in your locker, bar or pantry at any time. Only daily back up is allowed in cleaning lockers.
- Be aware of the MSDS (Material Safety Data Sheets) and the correct handling of chemicals.

General instructions

Important:

- Do not mix up chemicals and take them only from the Ecolab mixing stations. It is not allowed to use pure or overdosed chemicals.
- Wear proper PPE (Personal Protective Equipment).
- Under no circumstances non-labelled bottles or containers are to be used!
- Never fill up chemicals in a drinking bottle, i.e. a water bottle!
- Keep cleaning material and cleaning material lockers clean and tidy

Chemicals - Sanitizer

Oxivir Excel for Public Areas to sanitize:

- use a wet soaked rag
- wipe the area
- let it air dry

Note: Take this chemical only from Oxivir

mixing

Station.
Expired Oxivir needs to be collected in a special container!

Chlorine for food contact areas to sanitize:

- Pantries, tables and bar counter

Available as Powder (**Kay-5**) or Tablets (**Sanichlor**)

Chemicals – Handsoap / Hand Sanitizer

Only used for the Handsoap-Dispenser – Hand Sanitizer

- Epicare 3 (EU)
- SteriPower Hand Sanitizer
- Antibacterial Clean&Smooth (USA/Caribbean)

Chemicals – Glass Wash

- **Wash with**
Trump XL (EU) or Super Trump
(US/Caribbean)
- **Rinse with**
Clear Dry (EU) or Rinse Dry (US/Caribbean)

Chemicals – All Purpose / Floor Cleaner

- **All Guard 10**
All Purpose Cleaner
- **Oasis Enforce**
Floor Cleaner
- **Oasis 133**
All Purpose Cleaner (Sun Beds)

Chemicals – Steel/Metal Cleaner

- **Copper Shine**
Soft Metal Cleaner
- **Chromol**
Stainless Steel Maintenance
- **Medallion**
Stainless Steel Polishing

Chemicals – Beverage Station Cleaner

- **TM Desanamax (Powder and Liquid)**
Beer Line Cleaner
- **Thermoplan – Thermo Foam System**
B&W Coffee Machine (Milk Foam)
- **Thermoplan – Cleaning Tabs**
B&W Coffee Machine
- **Thermoplan – ThermoBlue** – Coffee machine Detergent

Chemicals - Others

- **Lime Away**

Lime Scale Remover

Note: Store separated!

CLASS

- **Dip It Plus**

Equipment Cleaner

- **Insecticides:** Sanitation Officer oversees all Insecticides.

Chemicals - Others

- **Bevi Draft and Bevi Tab: Cleaning detergent**
- **Universal Stone: All purpose cleaning Paste**

CLASS

Questions?

CLASS^S

Quiz

1. Explain the 3-bucket system.

- a) Wash, Sanitize, Rinse
- b) Rinse, Wash, Sanitize
- c) Sanitize, Rinse, Wash
- d) Wash, Rinse, Sanitize

1. What is the correct PPM used with the 3-bucket system?

- e) 150 ppm
- f) 127 ppm
- g) 100 ppm
- h) 200 ppm

Are you allowed to use chemicals other than those designated to Bar?

- a) You are not allowed to use any other chemicals other than those designated for the Bar Department.
- b) Any Chemical can be used for all purposes
- c) Any chemical can be used if allowed by supervisor
- d) We are not using any chemicals in the Bars

Quiz

In what case are you allowed to mix chemicals?

- a. You should NEVER mix chemicals. It is strictly forbidden
- b. You can mix any chemicals you want
- c. You can mix Lime Away together with Dip It in case needed
- d. You can mix chlorine powder and tablets

What should you wear when handling chemicals?

- a. We should always wear the proper PPE
- b. Does not matter what we wear
- c. We should wear the regular uniform
- d. We should always wear private clothes when handling chemicals

Thank you
